## ANNUAL CLUB PICNIC

August 22, 2021

The South Jersey Region had its Annual Club Picnic on Sunday, August 22, 2021 at the Paulsboro Sportsmens Club. There were 48 members in attendance. The picnic was catered by the Italian Kitchen of Pennsville.

Everyone had plenty to eat and just about everyone took home leftovers.

We ate inside this year because of the temperature, but once everyone was finished eating, many went outside to watch the boats go by on the Delaware and watch the planes take off at Philadelphia International Airport.

All in all, it was a super lovely day and everyone enjoyed a great time.

## BIRTHDAYS THIS MONTH

**SUNSHINE - Bonnie Green reports that she sent a get well card to Marven Chin & sympathy card to Ron & Doretta Scott**

## PRESIDENT'S CORNER

*Terry Shelton*

Hello everyone!

It has been a very busy and very hot summer for us all. But I am looking forward to Fall.

Thank you to everyone who came out to our Annual Club Picnic. We had 48 members attend and everyone had a wonderful time.

Unfortunately the weather cancelled the 4 Season Campground show but we hope to reschedule for September 18th.

My work schedule has been crazy and I hope to be able to enjoy a much cooler September.

Thank you,  
Your President,  
Terry Shelton

\*\*\*\*\*

## FROM YOUR EDITOR

Linda McFarland

Hello All!

This has been a really fun summer and I can't believe that September is already here.

We are starting off our month with the Wheels & Wings Car Show September 4th & 5th, at the Millville Airport. Hope you can come out to this great show. It is a very worthy cause for the Millville Air Museum.

Then there is the Hagley Museum Show at the Hagley Museum in Delaware. This show is always well attended and our members also help out with parking.

See you down the road!

Linda McFarland

\*\*\*\*\*

## FRIENDSHIP & FOOD NIGHT OUT

**Thursday, Sept. 16th—6:30 PM**  
**Barnsboro Inn, 699 Main St.**  
**Sewell, NJ 08080**

\*\*\*\*\*

We would like to express our sincere gratitude to everyone for their thoughts and prayers for us after mom's passing.

We truly realize that our club membership allows us the joy of being in another "family", and we appreciate being a part of the SJRAACA family!

An often used phrase, but so true, that words can never express our appreciation

Ron and Doretta Scott

## WHY IN THE WORLD DO WE TOUR IN THESE OLD CARS?

By Fran Shore

Think of a trip to see many friends from many states plus having your days planned by mileage and start times and sometimes sorted into groups for the space to be visited. Then add the fun of looking at the parking lot and the cars are all older than 25 years from the present date. The tours are set for the specific years of cars so that the vehicles can comfortably travel in similar speeds and to allow for the time needed for the driving to the venues to be visited. These tours are for cars from very old in the early 1900's to the models from 1936 to 1993 (as of this year's dates). The breakdown for some clubs may just be all Chevrolets, Fords or Buicks or a specific car or model or sorted by cylinders as well as years. For local club tours it may be any car 25 years or older.

So there is plenty of opportunity to find a tour for which you would be eligible with your vehicle. We have been all over the United States touring with our antique vehicles for many years. We have made friends from so many places and even from other countries as frequently members of these clubs from outside of the United States fly and then ride with our members. The fun is the camaraderie that becomes established. To laugh over the years and to have such wonderful memories of both places and people. We frequently get to visit places that are not ever open to the general public. The other enjoyment is to be in a vehicle from the past- some before our time of life and some that elicit memories of our childhood and younger years.

Is there a downside? Yes, Packing must fit the car's ability to store what you want to bring. Most important are tools, cleaning material and the space that is left is for the luggage. Ladies, you learn what you can live without! Also, for most cars in the era of the vehicles, air conditioning is to roll down the windows.

The other thought that must be given to these adventures and *they are adventures* is checking the vehicle THOROUGHLY before you go. Then have a credit card or cash or both with you in case of a breakdown or emergency of any kind. These emergencies do happen. Have we had any? Yes. Did we cope? Yes. Were we prepared? Yes. Do we still anticipate more antique car tours? Yes. Oh yes !!

We have toured in many cars over the years: a 1929 model A Ford rumble seat Coupe, a 1922 Durant open Touring car, a 1931 6-wheel ( side mounts) Willys Roaster, a 1936 Buick Century Convertible, 1949 Chevrolet Fleetline, a 1962 Corvette and a 1978 Corvette.

What do we feel has been the most important part of this hobby? The friendships of people we would never have known from so many places and the pleasure of seeing our own country so close. For the drivers and the owners it is the joy of maintaining a mechanical piece of history and still keeping it viable and in use. It is beyond the awards for antique cars; it is so personal to be able to maintain these pieces of automobile history and still enjoy them with what we all say that we have "Wheels On The Road."

**By: Jim Blaszczak, President, Pine Wood Model A Chapter - Texas**

Sometime around 200 BC or earlier, an ice cream like mixture was created in China made from milk and rice and packed in snow. In post medieval times it seems confectionery ice cream was developed in Italy and then moved into France by the 17th century. One of the earliest records of ice cream being served in the North American colonies was by the daughter of Lord Baltimore in the mid 1700s. Ice cream was a treat reserved for the privileged and affluent. It would be over 150 years before ice cream would be available to average folks in warm environments that did not have a readily accessible source of ice to freeze the cooked mixture.

The first American ice cream recipe was for vanilla and it was published in "The Virginia Housewife" in 1824. Among other things the recipe called for cooking a vanilla bean in milk to extract the flavor. Getting it to freeze back then was no simple process.

The first patent for a hand-cranked ice cream freezer was awarded to Nancy Donaldson Johnson in 1843. No longer was it necessary for someone to patiently and laboriously hand stir the mixture until it was frozen. Johnson's "Artificial Freezer" as she named it, used the thermodynamics of an ice/salt combination around a metal container that mechanically stirred the liquid solution until the dessert was frozen. She even developed a version that could freeze two flavors at once.

About 20 years after Johnson's "Artificial Freezer" was patented refrigeration technology was being invented, however, it wouldn't be until the late 19th century before it was commercially practical. During the 1920s the harvesting, storage and distribution of ice was a hugely profitable business. Due to the availability of ice and lack of electricity, it wasn't until the Model A era that ice boxes began to be replaced by refrigerators.

Unlike the rest of the country, in Texas, ice cream was not available until 1911 and then only in very small amounts. Why didn't we have ice cream in Texas until then? It wasn't until 1907 that the Brenham Creamery Company, Brenham, Texas was founded. From 1907 until 1911 the creamery only produced butter. Finally, in 1911 the creamery started making and selling ice cream. However, at that time it was made by the same method Nancy Johnson developed about

70 years earlier. Therefore, only 2 gallons per day were available for purchase.

Over the next decade the Brenham Creamery struggled financially until it's new leader, E.F. Kruse, still in his early twenties, turned the company around. A major part of the company's success was producing and selling ice cream as well as butter. The Brenham Creamery continued to prosper and expanded under Kruse's leadership. Just like the Model A for 1930, the Brenham Creamery was ready for an update and became Blue Bell.

In the early 1930's Blue Bell Creameries could only produce 30 gallons per hour of its immensely popular ice cream. In 1936 Blue Bell introduced a continuous freeze refrigeration system that allowed the production of ice cream to almost triple to 80 gallons per hour. Popularity and production of the creamery's flagship product continued to expand and overtake Blue Bell butter until in 1960 when Blue Bell Creamery discontinued the production of its original product.

Although Texans had to wait far longer for ice cream, than the rest of the country we made up for it. In 2001 Forbes named Blue Bell Ice Cream No. 1 in America.

## Fond Memories of AACA Touring

By Wayne Tuck  
Executive Vice President

As I'm dusting off the Model A, checking all the fluid levels, tire pressure, lights, horn, lubrication and getting in that test drive, I can't help but to reflect on all of our past tours.

Remember that stop in front of the U.S. Capitol Building to have our car's photo taken with the building in the background? Who would have thought you could arrange such an event for pre-1932 vehicles in a busy city? That feat was only topped off with an old time silent movie, accompanied by a live organ performance. What a great tour!

The Johnstown Flood Museum, Flight 97 Crash Site, a Mulch processing plant, Horseshoe Railroad, Ferry rides, private car collections boat rides on Raystown Lake, ice cream stops, coffee stops, caverns, museums, historical sites, I could go on endlessly with fantastic events provided by our regions sponsoring National Tours.

All of these events while enjoying the delight of driving an old car. Yes, there is something about double clutching, manual spark advance, open windows, large steering wheel, engine noise and whining gears that is invigorating. A step back in time.

All of this while meeting new friends and enjoying the company of old friends. One of the most enjoyable parts of touring is spending time in the hospitality room. Then there is the time spent walking around the parking lot full of old cars. As soon as someone sees a hood raised there is a gathering to see what the problem might be.

Don't forget the food. Seems every stop includes some sort of goodies. Most tours include a least a couple of "dinner on your own" opportunities that result in more time with your friends. Someone mentioned that they judge the quality of the tour by how many pounds they gain.

Touring is back. If you have never experienced the fun of an AACA National Tour, you don't know what you're missing. If you are already an avid tourer, look around your region for interesting points. Consider having your region step up to host a tour. Fun times are ahead.

## AACA CALENDAR OF EVENTS

Listed below are some upcoming National tours and meets you may be interested in attending:

### 2021-2022 National Calendar & Other Events
